RE: Letter of Reference

Dear Mr. Menefee:

We recently completed two projects with FA Design Build, one a bathroom renovation and the other the installation of a skylight in our living room. We are absolutely delighted not only with the design process, but also with the installation process for both projects.

Our home was built in 1959, and the bathroom we renovated was a similar age. We worked closely with Jessica Cannon, our designer, to define a small and challenging bathroom space with style, grace, and within budget. We are impressed with Jessica's creative approach to our space, her willingness to listen to and address our concerns, and her close attention to our budgetary limitations. The ultimate design is unique as well as functional and represents a true partnership with the client. The installation process, under the guidance of Chris Wiltshire, was professional and completed within the projected timeframe. We felt that we received personal attention at every step of the process, as well as follow-up to ensure that all outstanding issues were addressed.

The installation of the skylight, under the direction of Chris Wiltshire and Creg Howland, was simple and painless as well, and we are pleased with the additional light in our living room.

We heartily endorse FA Design Build for any home renovation project. We are pleased to serve as a reference.

Sincerely,

Diane Sandford
Michael Stueben
